MetaTrader 5 Commission Plugin

Introduction

The Commission plugin is intended to employ a certain percentage level of commission to be placed per trade in terms of money placed by the user. This plugin will take out a specified percentage from the placed order by deducting that amount from the user's balance as per requirement of the broker.
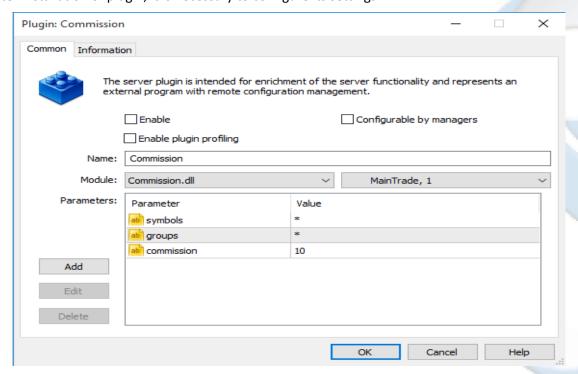

Plugin Installation

To install the plugin, the MetaTrader 5 Main Server program has to be stopped temporary before copying the Commission.dll file into the "MetaTrader 5 Platform/MainTrade/plugins" in the server root directory.

1. To stop the server, click on Start/Administrative Tools/Services.
2. Under the Services window, look for MetaTrader 5 Main Trade Server and click it.
3. On the General tab, under Service status, click on the "Stop" button and wait for the MetaTrader server to stop.
4. Transfer/Copy the Commission.dll file into the server root directory "plugin" folder.
5. Go back to Services window, click "Start" button to start the MetaTrader 5 Main Trade Server.

Plugin Configuration

After installation of plugin, it is necessary to configure its settings.

Parameter	Description
symbols	List of symbols to be processed by the Quotes Freeze plugin. The symbols can be listed using templates. For example, **USD***- all symbols starting with USD; **!SILVER,!GOLD,*** - all symbols except for gold and silver.
groups	Groups processed by the plugin. The groups can be listed using templates. For example, **demo*** - all demo groups, **!real,*** - all groups except for the real ones, **demoforex-usd, demoforex-jpy** - only groups named demoforex-usd and demoforex-jpy, respectively.
commission	The level of commission to be set per trade in percentage.

After configuration of the plugin, the MetaTrader 5 program has to be restarted for the new configuration to take effect. To restart, look to the top left of the MetaTrader 5 Administrator program once you have found it, please highlight the Main Server under "Network" in the left-hand side Tab then click on Restart Server, or right click the server and restart it..
